3x AAVs	3x AAVs	3x AAVs	P7	3x AAVs	C7			

Orientation:

Observation: Unlimited from Prospect Hill, IV Line at the 00 Northing, Hills at the 015 Northing has unlimited observation to the North

Key Terrain: Prospect Hill (NT 895 965), Dime Dingo (NU 875 015)

Obstacles: MSR Detroit to the West of Prospect Hill is impassable, Dime Dingo Hills IVO NU 885 010

Cover and concealment: Multiple hills and wadis throughout the Corridor offer cover and concealment

Avenues of Approach: MSR Detroit (N to S running road through the Delta/Prospect) is a company sized movement corridor

Situation:

Composition/Disposition/Strengths:

One mechanized infantry company occupies defensive positions in the PROSPECT - DELTA corridor. The company is suspected to be equipped with BMP-2Ms and BRDM-2Ms with AT-5 ATGMs and dismounted troops with AT-5s and SA-16 MANPADs. Specific unit defensive positions are unknown, but they are templated to have mutually supported fortified positions covering obstacles. Additionally, the enemy typically employs a forward combat security outpost for early warning and to delay attacking forces. The security elements are equipped with BRDM-2Ms, AT-5 ATGMs, and are suspected to occupy a position at NT899 997 in the PROSPECT - DELTA corridor.

Capabilities/Limitations:

Defend: Likely, will use the OP to AF/FFE on formations as they approach the obstacles. Obstacles and IDF will fix formations to be destroyed with direct fire.

Reinforce: Unlikely, Reinforcements from their HHQ are likely within 24 hours

Attack: Spoiling attack possible and limited offensive operations from a defensive position to gain time

Withdraw: Unlikely

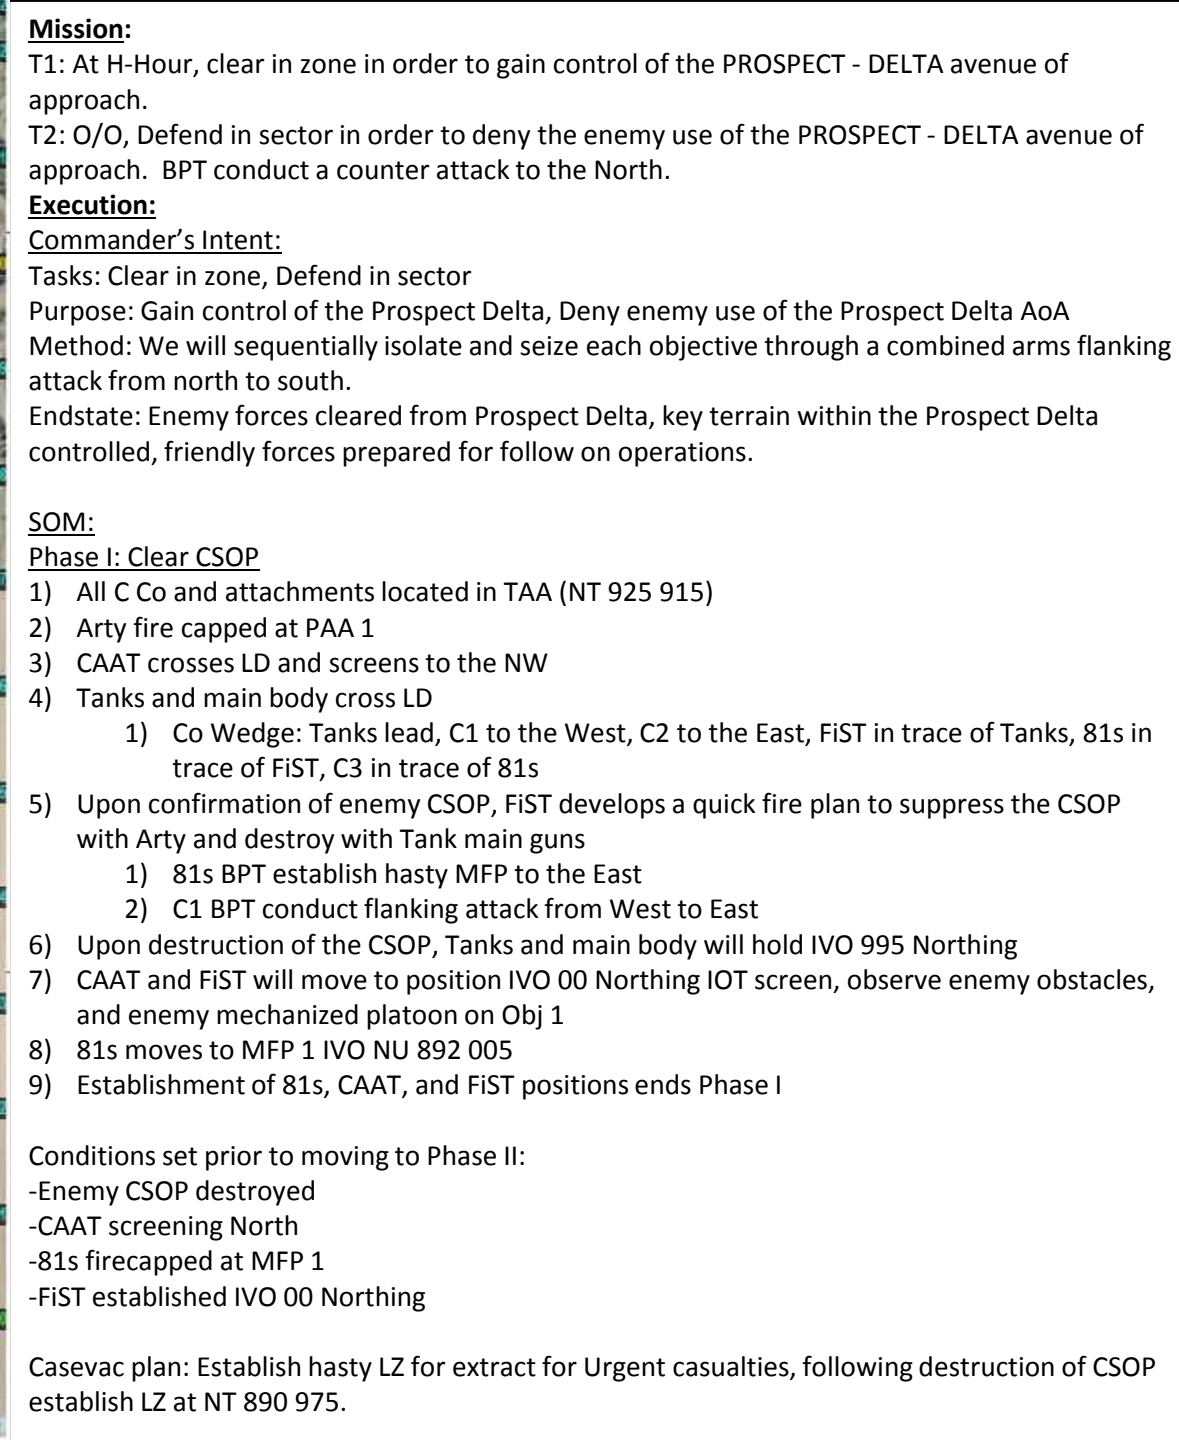

Delay: Likely

EMLCOA: Defend in place until reinforcements can arrive from the company to the north.

EMDCOA: Enemy conducts a spoiling attack prior to us reaching the objective.

Center of Gravity: Fortified defense in depth with natural and man made obstacles

Critical Vulnerability: Lack of mobility in their fixed positions.

T1: At H-Hour, clear in zone in order to gain control of the PROSPECT - DELTA avenue of approach.

Execution:

Tasks: Clear in zone, Defend in sector

Method: We will sequentially isolate and seize each objective through a combined arms flanking attack from north to south.

Endstate: Enemy forces cleared from Prospect Delta, key terrain within the Prospect Delta controlled, friendly forces prepared for follow on operations.

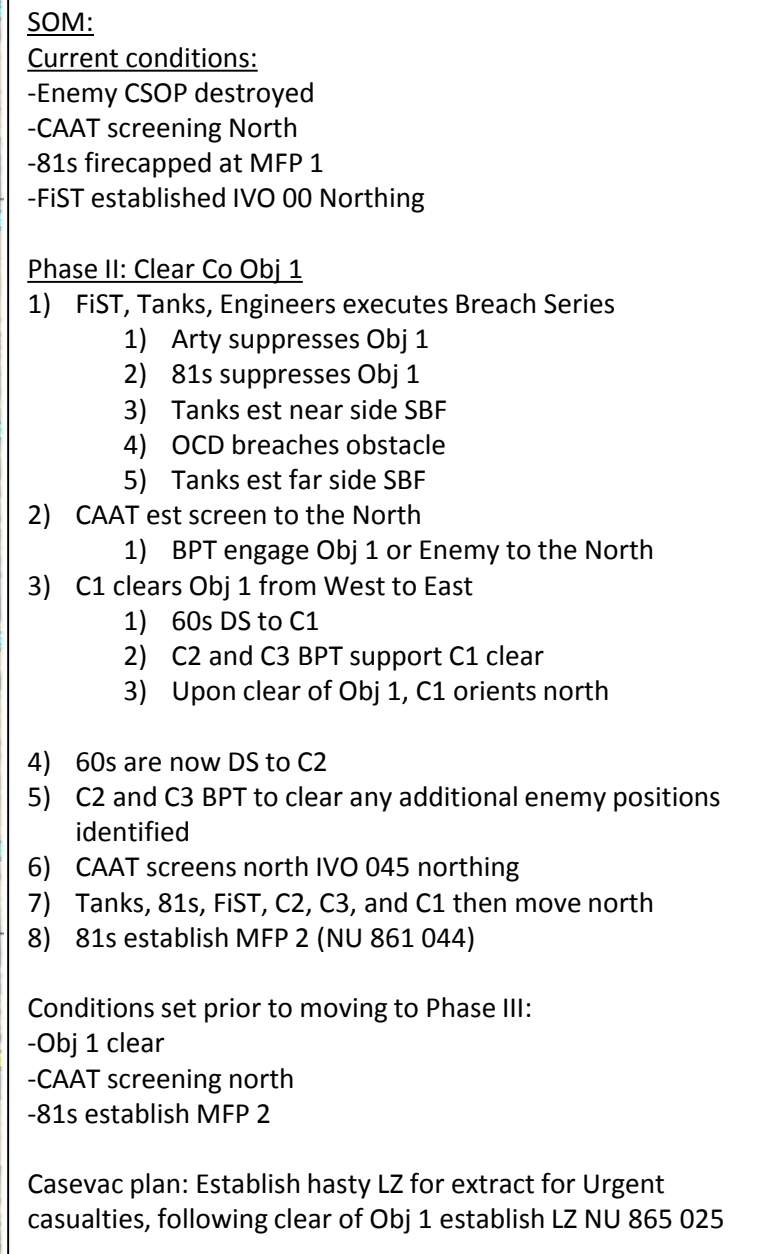

Phase I: Clear CSOP

- 1) All C Co and attachments located in TAA (NT 925 915)
- 2) Arty fire capped at PAA 1
- 3) CAAT crosses LD and screens to the NW
- 4) Tanks and main body cross LD
 - 1) Co Wedge: Tanks lead, C1 to the West, C2 to the East, FiST in trace of Tanks, 81s in trace of FiST, C3 in trace of 81s
- 5) Upon confirmation of enemy CSOP, FiST develops a quick fire plan to suppress the CSOP with Arty and destroy with Tank main guns
 - 1) 81s BPT establish hasty MFP to the East
 - 2) C1 BPT conduct flanking attack from West to East
- 6) Upon destruction of the CSOP, Tanks and main body will hold IVO 995 Northing
- 7) CAAT and FiST will move to position IVO 00 Northing IOT screen, observe enemy obstacles, and enemy mechanized platoon on Obj 1
- 8) 81s moves to MFP 1 IVO NU 892 005
- 9) Establishment of 81s, CAAT, and FiST positions ends Phase I

Conditions set prior to moving to Phase II:

- Enemy CSOP destroyed
- CAAT screening North
- 81s firecapped at MFP 1
- FiST established IVO 00 Northing

Casevac plan: Establish hasty LZ for extract for Urgent casualties, following destruction of CSOP establish LZ at NT 890 975.

Casevac plan: Establish hasty LZ for extract for Urgent casualties, following clear of Obj 1 establish LZ NU 865 025

SOM:

Current conditions:

- Obj 1 clear
- CAAT screening north
- 81s establish MFP 2

Phase III: Clear Co Obj 2

- 1) FiST adjusts Arty onto Obj 2
- 2) Upon effective suppression from Arty, Tanks begin moving to SBF
 - 1) FiST and CAAT move to OP and CAAT hot pos IVO NU 870 065
- 3) FiST adjusts 81s onto Obj 2
- 4) Upon effective suppression from 81s, Tanks moves to SBF position staying to East of the MSR
 - 1) C2, C3, C1 , and Engineers follow in trace
- 5) C2 clears Obj 2 from East to West
 - 1) 60s DS to C2
 - 2) C3 BPT support C2 clear
- 6) C1 and Engineers follow in trace
- 7) Upon Obj 2 clear, CAAT will screen north IVO 077 Northing
- 8) Artillery Battery will move from PAA 1 to PAA 2 (NT 890 980)

Conditions set prior to moving to Phase IV:

- Obj 2 clear
- CAAT screening north
- Artillery moving to PAA 2
- Engineers prepared to construct obstacles for the defense

Casevac plan: Establish hasty LZ for extract for Urgent casualties, following clear of Obj 1 establish LZ NU 861 076

SOM:

Current conditions:

- Obj 2 clear
- CAAT screening north
- Engineers prepared to construct obstacles for the defense

Phase IV: Establish deliberate defense

- 1) CAAT will screen north IVO 835 087
- 2) Engineers will begin constructing FEA obstacles IVO 079 Northing
- 3) C1, C2, and C3 will move to establish battle positions IVO 012 Northing oriented north
 - 1) From East to West: 60s, C1, C2, C3
- 4) 81s move to MFP 3 IVO NU 858 012
- 5) Tanks establish attack by fire position IVO NU 852 060
- 6) FiST remain at OP IVO NU 870 065
- 7) Artillery Battery est PAA 2 (NT 890 980)
- 8) C7 will coordinate for the tactical resupply of ammunition and fuel from LCE.
 - 1) Coordinate for EA elements resupply
 - 2) Coordinate for FEA elements resupply
 - 3) Following resupply LCE, LCE convoy will stage at NT 898 970.
- 9) CAAT will send an element to recon their hot position within the FEA IVO NU 872 063
- 10) FiST will establish priority targets to the NE of CAATs screen position and within FEA STEEL
- 11) Upon contact with enemy forces CAAT will destroy two BMPs or BRDMs and retrograde to their hot position IVO Nu 872 063
- 12) Upon enemy entering FEA STEEL, Tanks and CAAT will destroy 4x BMPs, FiST will fire smoke from Arty, allowing Tanks, CAAT, and FiST to retrograde to the main defensive position

Casevac plan: Move all casualties to the Company CCP located IVO 011 Northing

SOM:

Phase IV: Establish deliberate defense

- 1) CAAT will screen north IVO 835 087
- 2) Engineers will begin constructing FEA obstacles IVO 079 Northing (Priority 1), then move to the EA obstacles (Priority 2)
- 3) C1, C2, and C3 will move to establish battle positions IVO 012 Northing oriented north
 - 1) From East to West: 60s, C1, C2, C3
 - 2) 60s GS to the Company
- 4) 81s move to MFP 3 IVO NU 858 012
- 5) Tanks establish attack by fire position IVO NU 852 060
- 6) CAAT will send an element to recon their hot position within the FEA IVO NU 872 063
- 7) FiST will establish priority targets to the NE of CAATs screen position and within FEA STEEL
- 8) Upon contact with enemy forces CAAT will destroy two BMPs or BRDMs and retrograde to their hot position IVO NU 872 063
- 9) Upon enemy entering FEA STEEL, FiST will fire FEA Series, Tanks and CAAT will destroy 4x BMPs, FiST will fire smoke from Arty, allowing Tanks and CAAT to retrograde to the main defensive position
- 10) As the enemy advances south FiST will fire EA Series, we will engage with indirect fire weapons, followed by direct fire weapons.

Casevac plan: Move all casualties to the Company CCP located IVO 011 Northing
